

Protecting our patients, staff and you

To reduce the spread of respiratory illnesses, we are continuing to follow the CDC guidelines to better protect our patients, staff, and you.

Hospital Entrance Screening

We have limited our entry into the hospital so that our team is able to screen everyone for travel history, fever or respiratory symptoms.

Hospital Visitation

We are limiting hospital visitors to one person, age 18 years and older, per patient. Visiting hours are in accordance with hospital policy.

Exceptions may be made in the maternity units. Please ask the maternity nurse manager for more details.

All visitors will be screened for cold and flu-like symptoms. If you are experiencing any symptoms of illness, you may be asked to reschedule your hospital visit until you are symptom-free.

Thank you for your patience and support in reducing the spread of germs and protecting the health of our patients, staff and you.
