

Advanced Care  
at Home

# Home Tech Kit

The Home Tech Kit is deployed into the patient's home to allow for vital sign capture and communications with the patient care team in the Command Center.

There are nine components to the Kit.

**1: Connected Tablet**

Used for patient video calls, to review vital signs, capture photos, and patient surveys. The nurse can also upload patient education.

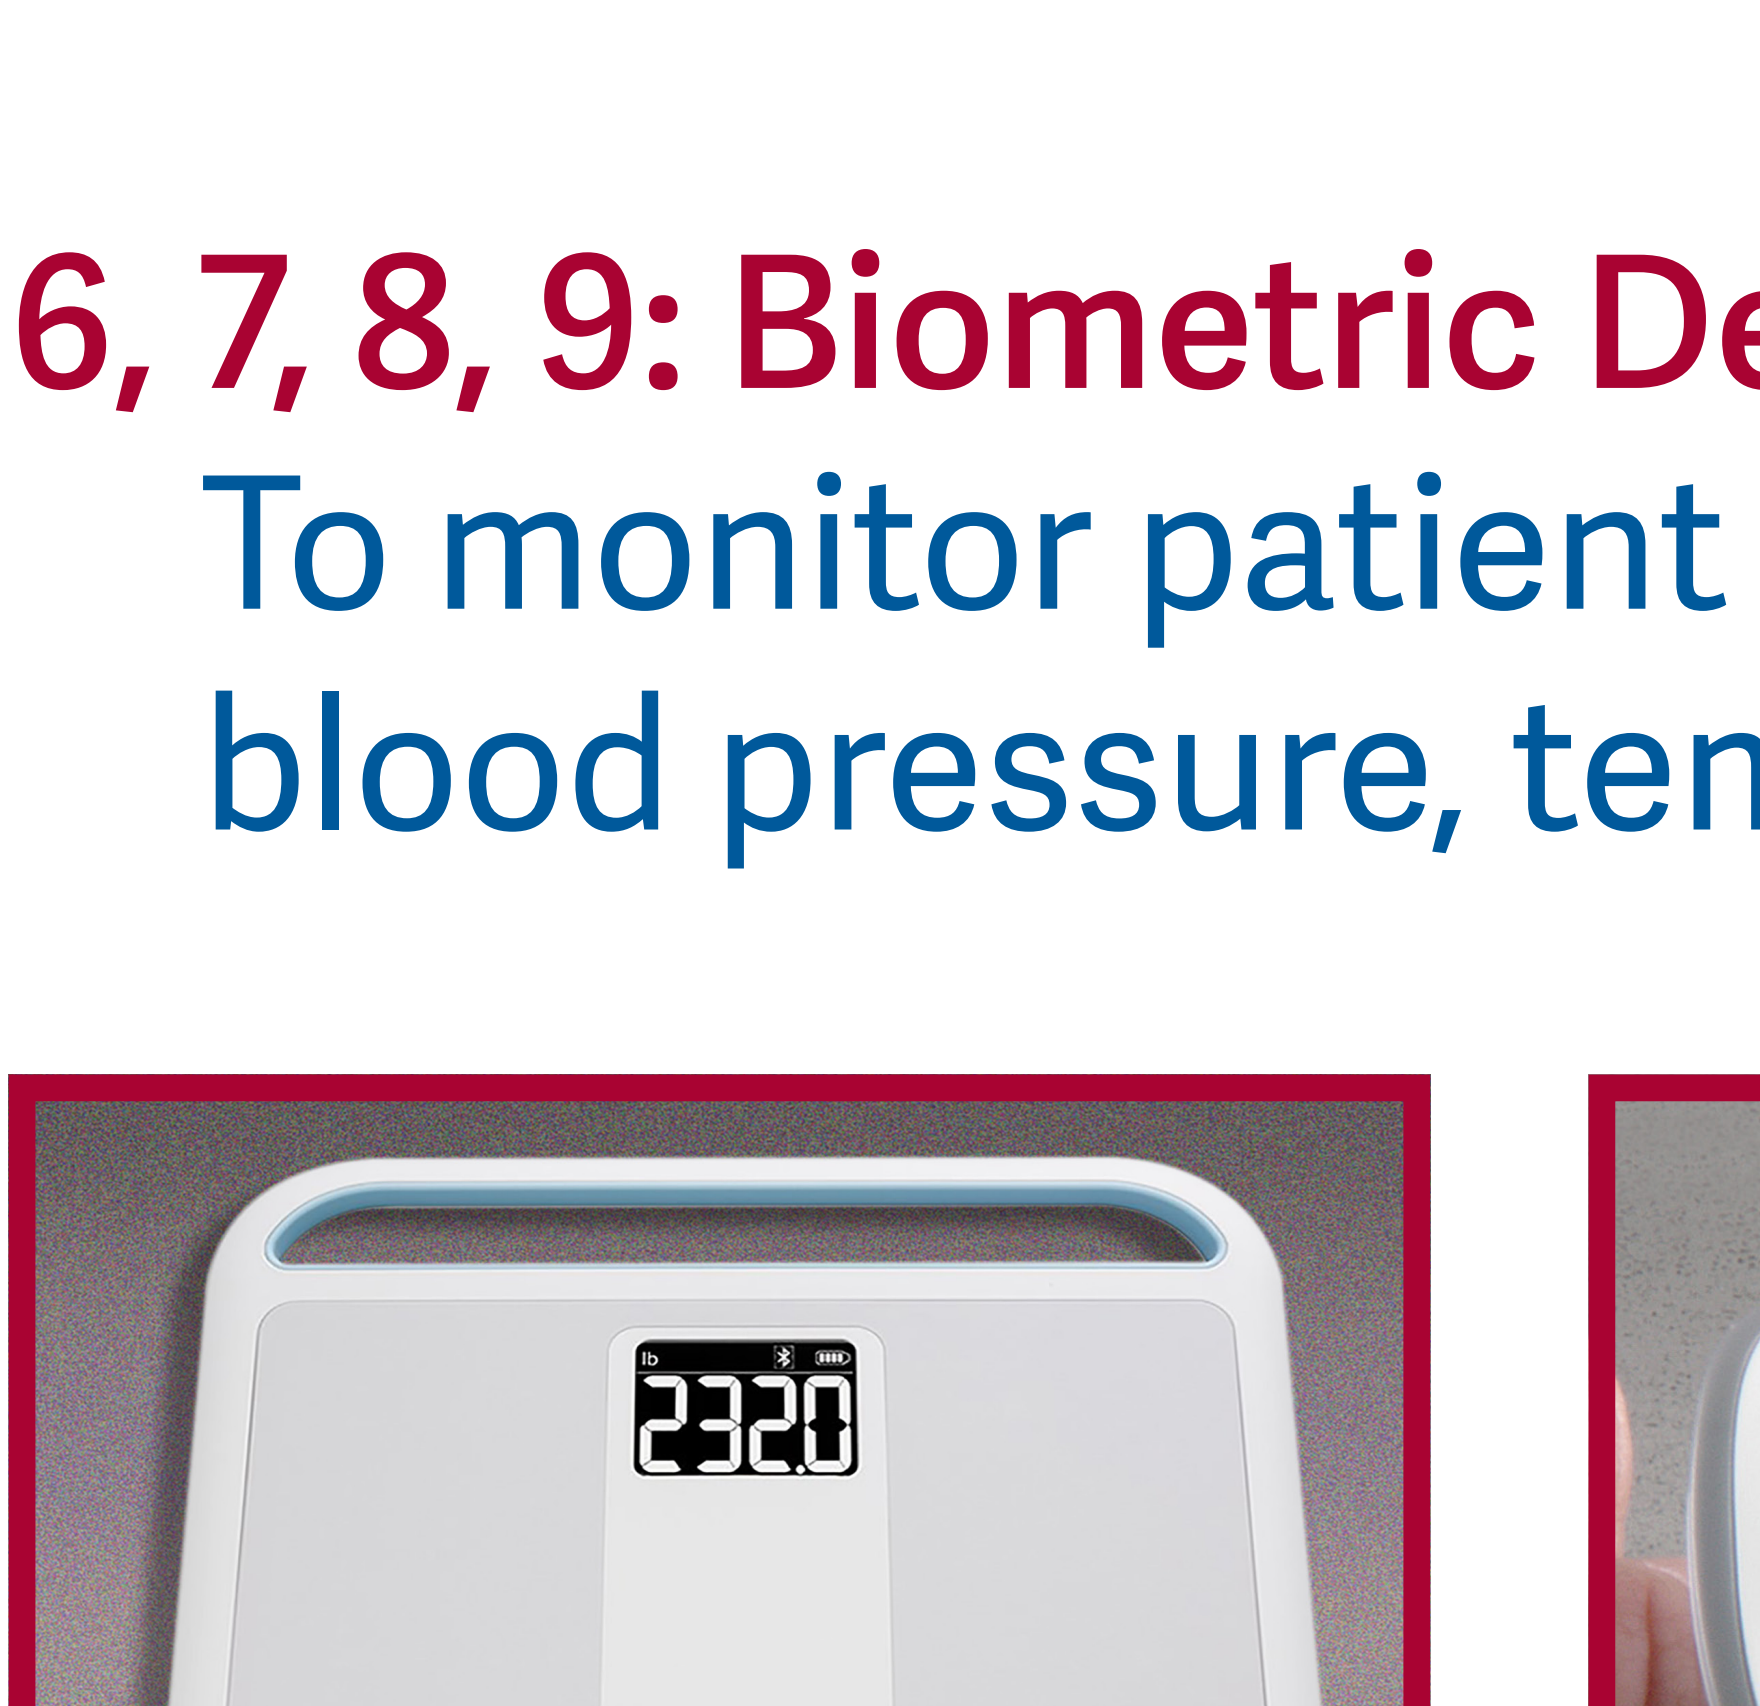

**2: Connected Phone**

Used for patient phone calls.

**3: Personal Emergency Response System (PERS)**

Allows patient to place an emergency call to the Command Center.

**4: Router**

Provides secure WiFi connectivity (using cellular networks) for all devices to Command Center.

**5: Uninterruptible Power Supply (UPS)**

A power management system that includes 12 hours of battery backup to the system in the event of a power outage.

**6, 7, 8, 9: Biometric Devices**

To monitor patient vital signs including weight, oxygen, pulse, blood pressure, temperature, and more.
