Comprehensive Driving Program Referral Information

Participation in the Comprehensive Driving Program requires a referral from a medical provider (MD, DO, OD, NP, PA, or etc). It is preferred that the client have a valid driver's license or learner's permit however, we are able to perform only a clinical evaluation to determine readiness to drive. Please have your medical provider send us the following information to get on our waiting list without delay:

- Client's Name
- Client's Date of Birth
- Client's Contact Information (or best person to contact to schedule an appointment)
- Client's medical insurance information
- Client's medical diagnosis – To be seen by our program, you must have a medical diagnosis that could affect your ability to drive safely. Our program provides a medical examination for driving.
- Client's Driver License number - Allows us to contact the state's DMV office in advance (if permit is needed to perform road session or license has been suspended.)
- Statement: Occupational Therapy Evaluation and Treatment for Driving Assessment
- Seizure / Loss of consciousness History (if applicable)
- Referring medical provider contact information (including fax number for report)
- Last office visit note (if available)

Please fax information to: Felicia Taylor, Outpatient Admission Coordinator, 865-331-2494
